

## THE ZIP TRACK #1130 (hands, arms, stomach, agility) \$1,491.00

**CONSISTING OF:** (1) Zip-Track with safety stop, (1) padded safety board, & (1) Carriage with handle

Hanging from a handle and flying through the air for 25' is a thrill by itself. Having to lift your legs to clear a foam shape and then again to brace yourself, makes this ride a real strength building experience.

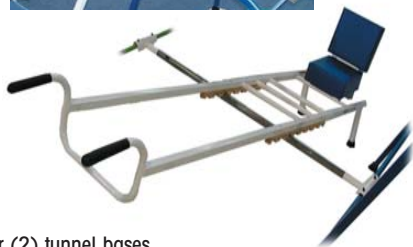

**Support Components\*:** (2) 7'6" trestles, or (1) 7'6" trestle and (1) 6' trestle, or (1) 7'6" trestle and (1) 6' tower base, or (1) 7'6" trestle and 1 wallbar unit

## THE WE SAW #1165 (arms push/pull partner station) \$1,414.00

**CONSISTING OF:** (1) We saw unit & (1) spade end bar

This variation on the playground seesaw is designed to work arm muscles by pulling and pushing to give your friend a ride. The We-Saw can be simply adjusted, by moving the carriage to one or the other side of the spade end bar (the fulcrum). It increases or decreases the leverage arm to match the weight of the one child to the strength of the other.

**Support Components\*:** (2) tower bases, or (2) trestles, or (2) tunnel bases

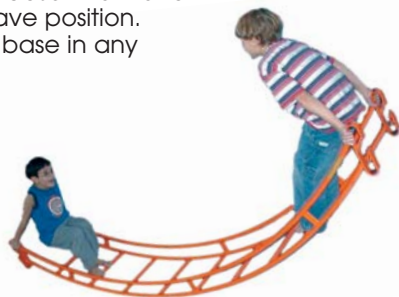

## THE VORTEX #1145 (shoulders, chest, stomach) \$1085.35

**CONSISTING OF:** (1) padded base, (3) tubes, (1) adjustable frame, (4) balls, & (1) catcher  
By lying on the padded platform in either direction a ball is placed in one of the three tubes and retrieved from the ball catcher on the other end. What a great abdominal workout when putting balls in the holes, racing against the clock.

## THE RAINBOW #1505 (arms, upper body, legs, teamwork) \$722.57

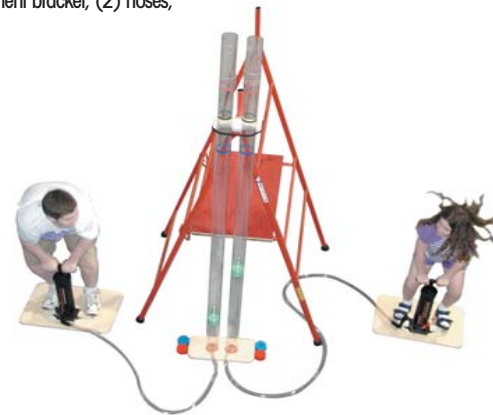

The Curved Bridge (9' x 17.75" w) or "rainbow" can be used on the floor or attached to any available base in either a convex or concave position. Attaches to any base in any direction.

## THE FIT-PUMP #1170 (arms, legs, back) \$595.00

**CONSISTING OF:** (2) tubes, (6) floats, (1) attachment bracket, (2) hoses, (3) pumps, (1) base plate, & (1) wall mount

Is it physics or fitness? Is it work or play? Is it competition or curiosity? It's all of the above and so exciting you can't put it down! No matter how it's used, kids who hate to exercise work up a sweat. Each air pump has three resistance adjustments. Each tube accepts three floats of different speeds allowing for 27 different game variations.

**Support Components\*:** Any trestle, or wall mount (enclosed)

## THE GLIDER #1135 (legs, arms, shoulders, core) \$1,275.00

**CONSISTING OF:** (1) 12' aluminum track with carriage, (2) pull straps, (1) sling seat w. chain, (1) push off pad, & (1) back cushion

Push off a padded safety board to glide backwards uphill and enjoy a leg press with a thrill. Turning around and focusing the other direction you may pull up the track with the use of the pull straps. It gives your legs a rest while your arms are working

**Support Components\*:** (2) 7'6" trestles, or (1) 7'6" trestle and (1) 6' or 5' trestle, or (1) 7'6" trestle and (1) 6' or 5' towerbase, or (1) wall bar unit and (1) 6' or 5' base

## THE WALL #1512 (hands, arms, agility) \$542.64

**CONSISTING OF:** (1) climbing panel

This 4' X 8' sheet of Baltic Birch with 16 hand footholds, including colorful numbers and letter shapes turns into an exciting climbing wall when hooked onto a 7'6" trestle. 45+ holds for 16 grips - you decide where you want them.

**Support Components\*:** (1) 7'6" tall trestle
